

Act>evo X-TRA Offroad

Castrol Act>evo X-TRA Offroad 4T with **Trizone Technology** is a premium quality part synthetic 4-stroke engine oil.

It is suitable for all makes of 4-stroke Japanese and North American ATV and dirt bike engines running on leaded or unleaded gasoline.

Other features and benefits:

- Available in SAE 10W-40 and SAE 20W-50 grades
- Exceeds API SG, JASO MA2
- Specifically formulated for ATVs and offroad dirt bikes
- Specially formulated "Heat Protection Molecules" work to protect your bike's engine against build-up of harmful high temperature deposits, keeping pistons and oil ways clean, even during the hard-ships of extreme offroad riding.
- Excellent oil consumption control

Available in 1 liter size

X-tra protection
for your engine

Act>evo X-TRA Snow

Castrol Act>evo X-TRA Snow 2T is a modern, high quality part synthetic 2-stroke snowmobile engine oil.

It is suitable for all makes of 2-stroke Japanese and North American snowmobile engines running on leaded or unleaded gasoline.

Other features and benefits:

- Exceeds API TC
- Specifically formulated for snowmobiles
- "Deposit Protection Formula" designed to provide continuous protection against build-up of carbon deposits on the engine and spark plug, keeping them clean to ensure fast and reliable starting.

Available in 1 liter size

X-tra protection
for your engine

Power RS TTS

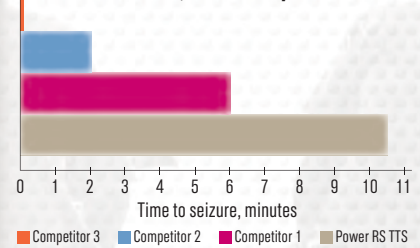

Castrol Power RS TTS 2T is an advanced, full synthetic 2-stroke engine oil.

It is suitable for all types of 2-stroke Japanese or European motorcycle engines running on race, leaded or unleaded gasoline.

Other features and benefits:

- Exceeds API TC, JASO FD, and ISO L EGD
- "Power Protection Formula" provides protection against thermal and mechanical breakdown, allowing the engine to produce maximum power without compromising protection.

Castrol High Speed Lubricity Test 8000 rpm, 260°C, 400:1 fuel/oil

- Protection against ring sticking and engine seizure
- Creates a tough, heat-reactive layer of protection
- Designed for both oil injection and premix lubrication up to a fuel/oil ratio of 50:1
- Extreme protection even at maximum RPM
- Engine cleanliness and virtually smokeless exhaust
- Proven to mix readily with unleaded gasoline and remain stable over long periods of time

Available in 1 liter and 4 liter sizes

Motorcycle lubricants

engineered with passion and pride.

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.™

Since the dawn of the motorcycle industry,

Castrol has played a vital role in developing and producing high-quality motorcycle engine oils, working closely with motorcycle manufacturers, racing teams, and customers to create the most technically advanced lubricants available.

The recipe of cutting-edge research and development, Castrol's partnerships with motorcycle manufacturers and top race teams, has resulted in the delivery of top quality motorcycle products. In Castrol laboratories around the world, the development of these premium oils is a continuous process.

What is the importance of Tri-Zone Technology?

Your bike's performance depends on the ability of three critical zones within it – the engine, clutch, and gearbox – to synchronize and operate efficiently as one. All Castrol motorcycle oils are specifically designed and tested to provide superior protection to these critical moving parts. This is the Castrol Tri-Zone advantage.

Which Castrol motorcycle engine oil is right for me?

Castrol motorcycle engine oils are designed with a high degree of focus on the needs of different riders. Extensive market research has identified distinct consumer segments for which dedicated products were developed. These segments range from commuting and touring, to racing and sheer pleasure. Superior oils with clearly defined benefits, helping to make product selection easier for the consumer.

2-Stroke	Castrol Power RS TTS 2T		Castrol Act>evo X-TRA Snow 2T

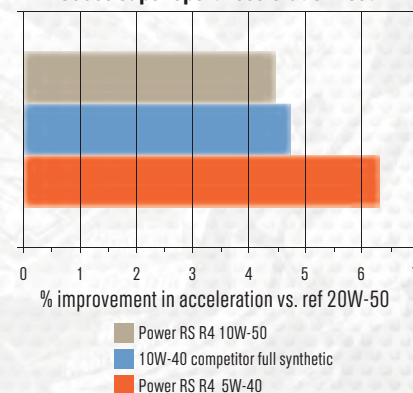

Castrol Power RS R4 4T with *Trizone Technology* is a full synthetic 4-stroke engine oil for high performance bikes.

It is suitable for all makes of four-stroke motorcycle engines, running on leaded or unleaded gasoline, including all high performance multi-cylinder, multivalve, V-Twin air or water-cooled sports or race models.

Other features and benefits:

- Available in SAE 5W-40 and SAE 10W-50 grades
- Exceeds API SL, JASO MA2
- Unique anti-friction, low viscosity formula

600cc Super Sport Acceleration Test

- Increased acceleration
 - Crisp, fast throttle response
 - Quick cold starts
- Maintains excellent engine cleanliness
 - Outstanding oil consumption control
 - Excellent wet clutch performance
 - Excellent protection of exhaust system

Available in 1 liter and 4 liter sizes

Ultimate power and performance

Castrol Power RS GPS 4T with *Trizone Technology* is an advanced premium quality part synthetic 4-stroke engine oil designed for modern engines.

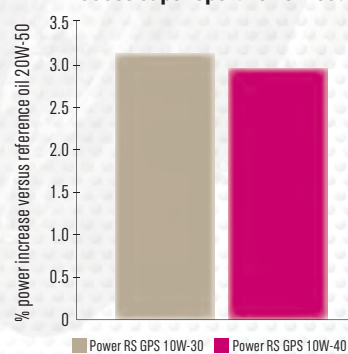

It is suitable for all types of high performance modern sports or race replica 4-stroke motorcycle engines running on leaded or unleaded gasoline.

Other features and benefits:

- Available in SAE 10W-30, SAE 10W-40, and SAE 20W-50 grades
- Exceeds API SJ, JASO MA2
- "Power Protection Formula" designed to protect your bike's engine from build-up of (heat derived) power robbing deposits.
- Extreme protection at high temperatures
- Superior high speed engine protection to help extend engine life
- Protection against thermal and mechanical breakdown
- Excellent oil consumption control
- Excellent gear shift quality
- Excellent wet clutch performance
- Excellent protection of exhaust and catalyst system

Available in 1 liter and 55 gallon drum sizes

600cc Super Sport Power Test

Get the best performance from your bike

Castrol Power RS V-Twin 4T is an advanced premium quality part synthetic 4-stroke engine oil designed for modern V-Twin engines.

It is suitable for all makes of Japanese and North American 4-stroke motorcycles with integral or separate transmissions running on leaded or unleaded gasoline.

Other features and benefits:

- Available in SAE 20W-40 and SAE 20W-50 grades
- API SJ, JASO MA2
- "Power Protection Formula" designed to protect your V-Twin engine from build-up of (heat derived) power robbing deposits
- Extreme protection at high temperatures
- Superior high speed engine protection to help extend engine life
- Protection against thermal and mechanical breakdown
- Excellent oil consumption control
- Protection against harmful engine deposits
 - Excellent gear shift quality
 - Excellent wet clutch performance
 - Excellent protection of exhaust and catalyst system

Available in 1 liter size

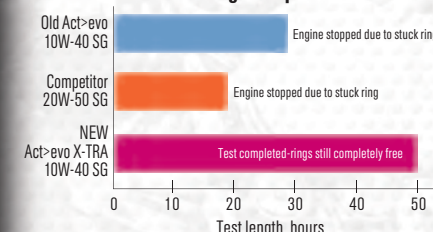

Get the best performance from your bike

Castrol Act>evo X-TRA 4T with *Trizone Technology* is a premium quality part synthetic 4-stroke engine oil specially formulated to protect your bike's engine against the build-up of harmful deposits even when you work your bike hard – on the open road or in dense city traffic.

It is suitable for all makes of motorcycle 4-stroke engines running on leaded or unleaded gasoline, including multi-cylinder, multi-valve, air or water-cooled sports or race replica models.

Castrol High Temperature Test

Other features and benefits:

- Available in SAE 10W-30, SAE 10W-40, SAE 20W-40, and SAE 20W-50 grades
- Exceeds API SG, JASO MA2
- Continuous protection of engine and transmission
- Protection against engine wear during long trips, short commuting, and stop/start conditions
 - Good oil consumption control
 - Good gear and wet clutch performance

Available in 1 liter, 4 liter, and 55 gallon drum sizes

X-tra protection for your engine
