TECHNICAL SERVICES AND SUPPORT IN ACTION

ACTION

YOUR ADVANTAGE IN AN INDUSTRIAL WORLD

CASTROL TECHSERVICE PUTS OUR EXPERTISE AT YOUR SERVICE

Castrol, having supplied the most advanced metalworking fluids and lubricants to manufacturing industries for many years, now offers a range of exciting added benefits for customers wanting to get maximum efficiency, performance and value from their Castrol products.

Castrol TechService puts our expertise at your service in vital areas like system contamination and lubricant monitoring. Castrol's services and on-site support help you control usage of our metalworking fluids and lubricants to reduce your manufacturing costs.

Our aim is to make you more competitive by providing the right Castrol products for the right application, and ensuring the products are employed efficiently.

Castrol's unrivaled range and application experience ensures that the optimal solution is employed the first time. We will never sell you a more expensive product than you need, or one that does not completely fit the purpose.

ALL THE PRIMARY FEATURES OF CASTROL PRODUCTSOLUTIONS

- Metalworking Fluids
- Lubricants
- Corrosion Preventives
- Cleaners
- Product selection and application advice

SERVICES AND EQUIPMENT COMPLEMENTING OUR PRODUCTS TO DELIVER COST SAVINGS AND IMPROVED APPLICATION PERFORMANCE

CASTROL TECHSERVICE FEATURES AND BENEFITS

- **Site or area survey** to review your applications and provide recommendations on improvements and their potential impact
- **Product selection** means you get expert advice in selecting the most suitable products and making sure they are correctly employed
- **Initial process set-up** is designed to get everything running properly from the outset, maximising your uptime
- **Support** with system changeovers provides optimal machine cleanliness and minimal system contamination
- **Timely sample analysis** provides you with the benefit of Castrol's testing, diagnosis and reporting process to improve the life of fluids, lubricants and machinery
- **Advanced application support** ensures that metalworking fluids and lubricants continue to operate at optimal performance levels to deliver sustained value
- **Tank side additives support and advice** keeps your system at peak performance and fully compliant with Health and Safety requirements
- **Staff training** on technical as well as Health, Safety and Environmental challenges, allows you to take advantage of our expertise and knowledge in managing metalworking fluids and lubricants
- **Lubricant monitoring and management** makes sure that your machines are operating at the highest levels of efficiency
- **Bearing temperature surveys** assure optimal usage of products, and delivers consistently high performance and reliability

CASTROL TECHSERVICE
TECHNICAL SERVICES AND SUPPORT IN ACTION

CASTROL TECHSERVICE IS YOUR ADVANTAGE

With Castrol TechService you receive products and services from a world-class supplier, giving you access to highly experienced account managers and technical engineers who understand the challenges your business faces, and provide you with the right solution.

It also means unrivaled application expertise and a genuine commitment to your industry. By getting the right Castrol products and service, you increase both product life and maximise machine uptime – the perfect formula for peace of mind operation.

Putting performance and safety first

At Castrol, we make sure that all our employees, contractors and distributors are well informed, well trained, engaged, and committed to the Health, Safety and Environmental improvement process.

We recognise that safe operations depend on competent people and an active HSE culture.

We will provide you with the right monitoring plan to meet your HSE goals, including performance requirements to deliver a safe working environment.

We can also advise on the best products to meet environmental obligations and support your green policy, including disposal and product life extension.

Think of Castrol TechService as an investment of time and money, encouraging better performance and raising plant efficiency. That's the advantage Castrol brings to you in a competitive industrial world.
