

PRESS RELEASE

27th October, 2010

Castrol Offshore showcases its capabilities at ADIPEC

Castrol Offshore is exhibiting at the Abu Dhabi International Petroleum Exhibition Conference, UAE, 1st - 4th November. The lubricants manufacturer will be showcasing its specialist product ranges and global supply and service capabilities to the surface production and drilling market.

A global business with 35 years experience in the drilling market segment, Castrol Offshore has regional offices in USA, UK, Norway, Azerbaijan, Singapore, Dubai and South Africa.

Castrol Offshore supports its Middle East customers with dedicated account management and full technical support via its Dubai office. The majority of Castrol Offshore's range of Core lubricants, and selected Specialist lubricants, are blended locally at Castrol's lubricants blending plant in the Jebel Ali free zone, with an annual capacity of 140,000 tonnes.

William D'Souza, Regional Business Manager Middle East, Castrol Offshore Lubricants, said: "Castrol Offshore has a range of tailor made offers for regional and global drilling customers. Visitors to our stand (number 05105) at ADIPEC will be able to learn more about our service and product ranges, including: Ultimax: high performance lubrication solutions; GreenField: environmentally responsible lubricants designed to help operators minimise their impact on the marine environment; and LabCheck, Castrol's used oil analysis service with online reporting."

Castrol Offshore customers include various regional and global drilling and production companies. All customers are serviced via Castrol or its distributors and are supported through a single point of contact within the Castrol Offshore team.

Issued on behalf of the Castrol Offshore Press Office by James Brady.
