The offsets highlighted in the first three rows of Table 6.1 represent a carryover of 399,918 tonnes from the 2021 Achievement Period. They were purchased and retired in 1Q 2022, but not used due to the difference between forecasted and actual GHG emissions for 2021. Scope 1 & 2 offsets have been removed from this table as they are included in a separate Castrol QES / application for Scope 1 & 2 carbon neutrality.
