

An offer designed to help you get your production back on track

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.

# **INDUSTRIAL SUCCESS** WE HELP MAKE IT HAPPEN

When you restart production, it will be extremely important that you do so in the right way.

You will need to take precautions for the health and safety of your team, ensure availability of raw materials, and handle many other important things.

Making sure that your lubricants are in the right condition will also be critical for a smooth restart. That is why Castrol has designed this offer to support you with all your lubricant related requirements for restarting production.

#### EASIER ¢) PROCUREMENT

To decide on sump changeover

REMOTE

CONDITION

MONITORING

For all lubricant requirements

For running operations smoothly

 $\mathbf{A}$ 

# INDUSTRIAL SUCCESS WE HELP MAKE IT HAPPEN

### REMOTE CONDITION MONITORING

Lubricants need to be checked for contamination, bacterial growth and other critical parameters before starting production

In view of the travel restrictions, we will remotely assist you in testing the condition of your lubricants and determine if it needs a changeover

### EASIER PROCUREMENT

Procuring lubricants from multiple suppliers will require greater effort and time

We have the complete range of products and have presence across the country to service all your lubricant requirements through a single touchpoint

#### VIRTUAL TECHNICAL SUPPORT

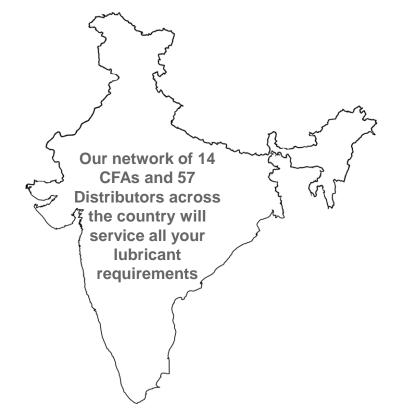

At this critical time of restarting production it is important to get the right technical support in a timely manner

Keeping norms of social distancing in mind, our team will connect with you remotely and provide all the necessary support

Our experts are always available to work with you: offering the advice you need to increase productivity and reliability while keeping costs and environmental impact under control
